TECHNICAL NOTE

#23

As of December 1997, all UPLR220 right angle connectors are being date stamped in conjunction with their manufacture. The stamp is located on the body. The stamp consists of the part number (UPLR220-XX), the date representing the year and week in which it was manufactured (i.e. 9803: the 3rd week of 1998), and TEI 14949. We are also now stamping UPLFF220's, (U)PL220, and adapters.

Date stamping gives TEI an added mechanism to better track our processes. Any connectors manufactured subsequent to this period are completely reliable, both mechanically and electrically.

If you need any further amplification, or your customer asks a question which is not addressed, contact Bill Berger in Technical Support at (818) 865-6534, or e-mail at bill.berger@trompeter.com. We look forward to your questions.
