## TECHNICAL NOTE

#45

Revision B

11/20/00

This technical note is regarding our new *Tool Kit*, talking dog part numbers. Recently, we have had a rash of customers that are demanding very custom kits and want their own unique part numbers. This is a big problem because the quantities are never huge, but to accommodate them requires the time consuming and expensive process of generating new drawings or Engineering Change Orders on existing drawings. We have worked out a system where we have covered practically every possibility.

Attached are three tables. Table one is the matrix for our small tool kit. The small tool kit will use the TK2 toolbox. Table two is the matrix for our medium size tool kit and will use the TK6 toolbox. Table three is the matrix for our large kit and will use the old TK4 case, but will have a new foam cutout to accommodate the widest array of tools.

There are some unique features that I will discuss regarding these tool kits:

- 1) No letter O will be used. This will preclude any confusion with the number zero.
- 2) While not all tools will have a letter designation, the letter Z will be used for anyone who must have a non-designated tool. When generating the part number, place the Z as a placeholder and then list the non-designated tool as a separate line item. The tool will then be placed in the kit in the appropriate slot before shipping. Not all tools will be allowed to be substituted using this designation. For example, the BWS will not be allowed to be substituted in lieu of the BCWS in the TM tool kits
- 3) All three kits will automatically come with a CT4L crimp tool, so no special designation is required. If a customer wants a CT3 or CT4, they will have to buy it separately and replace the existing tool.

- 4) No dashes will be used in any of the part numbers.

The new tool kit numbers will not replace existing part numbers already issued. For example, if your customer is already ordering for example a TK2-7, then they can continue to do so.

We do want you to know that with anything new, there will be some growing pains. I am convinced; however, that in the long run, this system will be very beneficial to both Trompeter and our customers.

If you need any further amplification, or your customer asks a question that is not addressed, contact Bill Berger in Technical Support at (818) 865-6534, or e-mail [bill.berger@trompeter.com](mailto:bill.berger@trompeter.com). We look forward to your questions.

## Small Tool Kit

**Trompeter Electronics,  
Inc.**

Talking Dog Tool Kit

Prefix	Crimp Die #1	Crimp Die #2	Crimp Die #3	Crimp Die #4	ST1 STC-F	Center Pin Crimper	Cable Cutter	Gauge or Tester	Removal Tool
TS	X	X	X	X	X	X	X	X	X
	NONE	=	0						
	CD3	-1	A			010-0088	1	010-0108	RT1L
	"	-2	B			A		1	A
	"	-3	C		1	010-0097	0	010-0133	RT1S
	"	-5	D		OR	B		2	B
	"	-19	E		0	010-0098			RT1SS
	"	-21	F			C			C
	"	-22	G			010-0055			RTR1-L
	"	-23	H			D			D

CT4L INCLUDED IN KIT, BUT NOT SHOWN IN PART NUMBER.

Only the number 0 (zero) is to be used. The letter "O" is not to be used in this part number system.

The letter "Z" can be used in any position to specify item not included above. This custom addition must be ordered as a separate line item.

Example part number:

TS	E	F	0	0	1	B	1	1	A
	CD3-19	CD3-21	Empty	Empty	ST1/ STC-F	010-0097	700- 0024	010- 0108	RT1L
